**MAKE CODE VIOLATION MANAGEMENT EFFECTIVE TO IMPROVE
THE QUALITY OF LIFE FOR ALL.**

ABOUT CODE MODULE

Our municipal code enforcement software is an efficient, but simple-to-use module that automates the issuing and monitoring of citations, as well as providing court case management functionality to monitor violations through the local adjudication process. For all law compliance officials and constituents, it makes it easier to resolve city code breaches through Codes Enforcement Municipal Software. With the system's automated ability to collect complaints and process them through the workflow, constituents see resolution in minutes rather than months in our code violation services.

MUNILOGIC CE HELPS ALL CODE ENFORCEMENT PERSONNEL WORK MORE EFFECTIVELY TO DELIVER THE BEST SERVICE TO THE COMMUNITY'S RESIDENTS BY MODERNIZING THE CODE COMPLIANCE OPERATION HENCE IMPROVING THE CODE VIOLATION SERVICES BY OUR STELLAR MUNICIPAL CODE ENFORCEMENT SOFTWARE.

MuniLogic CE enables management of local government codes and any potential code violations to improve compliance. Create a comprehensive history of all code violations for a better perspective on current challenges, identify recurring problems and take proactive measures to increase the level of compliance.

- Configure violation notice intervals and provide notification when due.
- Retrieve ordinance descriptions from the database automatically, saving time over constant typing.
- Schedule and assign investigations to field personnel directly on MuniLogic shared calendars using municipal code enforcement software.
- If a violation originates from a request, maintain this relationship to determine the originating source.
- Log all fees and civil action in our Codes Enforcement Municipal Software.
- Maintain all photos, reports, or other documents directly on the code case thus giving a better code violation services.
- Use the calendar tool to keep track of hearing dates, hours, and places, and use the software's location information to see other cases that have been assigned to a certain location.
- Set up real-time warnings on situations that can be tailored to the specifics of each offense.
