**MAKE YOUR LICENSE MANAGEMENT EFFICIENT,
EFFECTIVE, AND ECONOMICAL.**

ABOUT LICENSE MODULE

MuniLogic CE's online license & Permits management software enables you to handle multiple types of licenses. This module can issue, calculate, and manage all kinds of authorizations, from the traditional contractor, rental, amusement, plumbing, and health licenses to any customized license issued from your town hall. Another significant benefit of MuniLogic's online license & Permits management software is its ability to generate large batches of new or renewal certificates whenever you wish to send them out. Ready to simplify your overall management of licenses? Spend less time being frustrated and more time on things that matter. Contact us today to find out more.

The tools and procedures that a company uses to document and maintain its licenses to ensure conformity with the license are referred to as license management. When a corporation implements a robust and effective license monitoring scheme, it saves money and guarantees that it stays in compliance. MuniLogic's Business Licensing and Permits Municipal software provides visibility into the company's tech infrastructure, use, permits, and contracts, allowing you to see what software is being used, how much it is being used, where it is being used, and by whom. Managing various license terms and conditions while keeping a correct and up-to-date view of use is a difficult task. It's also become more complicated as IT environments transition to the cloud, become more virtualized, and are continuously affected by organizational change, hence MuniLogic CE's online license and Permits management software and Business Licensing and Permits Municipal software are all up to serve you.

- Configure expiration dates based upon a single date, a number of days or the end of the calendar year.
- Licenses automatically expire and provide notifications.
- Provides the ability to perform license renewals on a regular basis

- Online license & Permit management software tracks all insurance requirements and trade references.
- Assign fees taken directly from your fee schedule and log all transactions.
- Maintain all insurance certificates, reports, or other documents directly on the license thus giving the finest Business Licensing and Permits Municipal software.

If you are ready to simplify your license management, give us a call today or email to learn more.
