ABOUT SUBDIVISION MODULE

MuniLogic CE enables local governments to manage the entire subdivision approval process in one place from applications to final approval, including reviews by various departments, scheduling of inspections, issuing permits, etc.

- Configure violation notice intervals and provide notification when due.
- Retrieve ordinance descriptions from the database automatically, saving time over constant typing.
- Schedule and assign investigations to field personnel directly on MuniLogic shared calendars.
- If a violation originates from a request, maintain this relationship to determine the originating source.
- Log all fees and civil action.
- Maintain all photos, reports or other documents directly on the code case.

If you are ready to simplify your subdivision management, give us a call today or email to learn more.
