TRACK ALL ACTIVITY WITH IN ONE PLATFORM

ABOUT PERMIT MODULE

MuniLogic's Permit Module is the all-in-one solution designed to streamline every aspect of your permit and inspection lifecycle. It is a fully integrated component of the MuniLogic suite, connecting your office, your field staff, and your citizens on a single, unified platform—from the initial online application to the final mobile inspection and digital certificate issuance.

- **Centralized Review and Processing:** Your team reviews the incoming application in a dedicated queue, processes payments, and performs plan reviews within MuniLogic's unified interface.
- **Stop wasting time digging through files.** Our platform brings all your permit-related information together in one secure, accessible location, creating a single source of truth.
- **Automated Checklists:** Configure default inspection items based on the permit type to ensure consistency, standardize procedures, and guarantee no step is missed.
- **Flexible Fee Schedules:** Configure your municipality's unique fee schedule directly into the system for accurate calculations every time. Our system even supports dynamic fees that scale based on values entered in the application form.

Let us show you how MuniLogic can empower your municipality.
