TRACK ALL ACTIVITY WITH IN ONE PLATFORM

ABOUT ZONING MODULE

MuniLogic's Zoning Module is the all-in-one solution designed to transform and simplify your zoning process from end-to-end. As a core component of the MuniLogic suite, it ensures every zoning appeal is managed within a single, unified system, providing unparalleled organization and insight.

- **Centralized Application Intake:** Create a new zoning appeal and link it directly to a parcel from our Property Module. The system can be configured to automatically determine the correct board jurisdiction based on the purpose of the application.
- **Property Linking:** As the bedrock of MuniLogic, every zoning case is seamlessly linked to a specific property parcel, automatically populating site information and providing a full history of all code, permit, and license activity at that location.
- **Automated Deadline Management:** Automatically configure and track the number of days required for hearings and decisions based on municipal code. Easily create and log extensions or continuations for an appeal, maintaining a clear record of the timeline.
- **Dashboards:** Get a high-level, visual overview of your active zoning cases right from your dashboard, helping you monitor workloads and upcoming deadlines.

If you are ready to bring clarity and efficiency to your zoning and planning management, give us a call today. Contact us to learn more!
