

MuniLogic

Permit Module

MuniLogic's Permit Module manages all your permit and inspection activity. This module is capable of issuing any type of permit, including Building, Plumbing, Mechanical, Fire, Zoning etc. All inspections can be assigned to field personnel and scheduled directly onto their calendars. Results are maintained within the same area for quick access to critical information.

- Add multiple permit types for each permit application.
- Schedule and assign inspections to field personnel using MuniLogic shared calendars.
- "Roll-up" fees, plan reviews, and inspections to gain an overall perspective on the permit activity.
- Assign fees taken directly from your fee schedule and log all transactions.
- Configure required licenses by permit type to ensure proper approvals.

READY TO SIMPLIFY YOUR PERMIT MANAGEMENT?

We're happy to share more information or schedule a demo.
