

# Property Module

The Property module consolidates information for all property using your tax parcel number to identify each record. You can easily search using owner or renter information, sales history, or other financial data.

- Includes all property information including address, ownership, contact information, sales information, site characteristics, districts, improvements, etc
- Store custom notes for each property
- Manage easements on each property
- View assets such as sewer services using the Relationship Navigation feature
- Link documents related to the property
- View property on a map using GIS mapping
- Maintain property ownership records including date of transfer and renter information
- Use ownership information to create form letters or mailing labels
- Create custom fields

## READY TO SIMPLIFY YOUR PROPERTY DATA?

We're happy to share more information or schedule a demo.
