

License Module

MuniLogic's License Module enables you to issue multiple types of licenses. This module is capable of issuing or managing any type of license, including Contractor, Rental, Amusement, Plumbing, Health and more. MuniLogic will also generate batch invoices for a large group of renewals.

- Configure expiration dates based upon a date, number of days or the end of the calendar year.
- Licenses automatically expire and provide notifications.
- Perform license renewals at a regular interval.
- Track all insurance requirements and trade references.
- Assign fees taken directly from your fee schedule and log all transactions.
- Maintain all insurance certificates, reports or other documents directly on the license.

READY TO SIMPLIFY YOUR LICENSE MANAGEMENT?

We're happy to share more information or schedule a demo.

MuniLogic tools simplify how you manage your local government. Originally developed by the engineers at Carroll Engineering, the MuniLogic platform is based on decades of experience supporting local government needs. We're committed to technology that's simple to learn, easy to use, and supports the needs of your constituents, staff, and government.
