

MuniLogic

# Roadway Module

Completing a comprehensive inventory of your roadway related assets provides the ability to perform more advanced analysis and asset management. MuniLogic SE helps you track all inspection and maintenance activity and asset value. Enhance your system management by integrating GIS mapping, document management, and creating relationships with your other geographic data.

- Quickly identify the age and condition of assets.
- Create and modify routes for collection of refuse, leaves, etc.
- Maintain a complete history of all inspection and maintenance activities.
- Create work orders with full assignment and scheduling to crews.
- Maintain asset value using various methods for GASB34 reporting.
- All assets are linked to other MuniLogic SE modules for Mapping, Reporting, and Documents.

**READY TO SIMPLIFY YOUR ROADWAY RELATED ASSES MANAGEMENT?**

We're happy to share more information or schedule a demo.
